

Students Attending Universities and Other Institutions of Higher Learning in Prussia (1869–1912)

Abstract

During the Bismarckian period the number of students attending Prussian universities and other institutes of higher learning shot upward, from about 18,000 in 1869 to over 40,000 in the mid-1890s—far exceeding the rate of growth among the adult male population (women were not permitted to attend university). More and more university students came from lower-middle-class backgrounds. The proportion of students from families of the educated middle classes [*Bildungsbürgertum*] declined correspondingly.

1908	47,253	11,315	342	830	1,306	1,553	62,599	20.08
1909	50,612	11,365	323	826	1,233	1,607	65,966	20.87
1910	52,766	11,502	291	806	1,220	1,617	68,202	21.29
1911	54,999	11,378	338	791	1,328	1,446	70,280	21.65
1912	56,483	11,349	327	805	1,269	1,477	71,710	21.77

NOTES

^[1] Male and female students; the student numbers were probably expressed as a percentage of the male population because the number of female students was basically negligible—for instance,

during the winter semester of 1911/12 only 1,896 women were enrolled in Prussian universities as opposed to 26,550 men. [*Statistisches Jahrbuch für den Preußischen Staat* (1915): pp. 265, 267.]

[2] From 1910 onward, this does not include the Forest Academy in Aschaffenburg.

[3] From 1912 onward, this does not include the Veterinary University in Stuttgart.
