

## Employment Office in Frankfurt am Main (1975)

### Abstract

---

The oil crisis in 1973 and the associated rise in energy prices caused a dramatic economic recession in the Federal Republic. The poor overall economic situation and massive industrial job losses—largely due to the transition to a service society and the onset of globalization—led to a huge spike in unemployment. This photo shows applicants in the hallway of a Frankfurt employment office. Photo by Abisag Tüllmann.
